

Tuesdays with Troutwood

TROUTWOOD

1

Play Buy, Sell, Hold

Each day, students play with \$10/day and track their progress.

- ✓ Each student enters their total score and years played into your attendance spreadsheet.
- ✓ Monitor class performance over time

2

Research Finance Terms with Finglish

Each student selects two finance terms from the Finglish library to research.

- ✓ Students record their terms and definitions in the attendance spreadsheet.
- ✓ Randomly call on students to share:
 - The term they researched
 - What they learned
 - Why they chose it

Knowing they might be called on raises the stakes and increases engagement!

3

Explore the "Map of the Markets"

Use Troutwood's Map of the Markets and toggle on "S&P 500" to focus on these companies.

- ✓ Each student picks one company and records the following details:
 - Year founded
 - Market capitalization
 - Founder
 - 1-year price return
 - Total # of employees
 - Product the company is best known for
- ✓ Randomly call on students to share their company and reasoning.

Be proud of your students for taking ownership of this in-class effort and enjoy the conversations it creates!
